

Evaporative Emissions System

Model 640

The EVAP Trainer emulates the GM enhanced EVAP system. The trainer runs the GM Service Bay EVAP Test using either the built-in scan tool or with a Tech2™. Add fault codes either locally through the keypad or remotely through the Classroom Management Program (CMP).

Features:

- Built-In Scan Tool
- Manual Fault Insert Keypad
- Runs Engine Off Natural Vacuum (EONV) Test
- Clear hoses assist in diagnosing system leaks when using a smoke machine (not included)
- EVAP Service Port
- DLC (tool not included)
- Courseware included: Student Manual, Instructor Guide, Service Information
